ToDoApp

By: Tyler Birmingham

Project Overview

A simple task scheduling application where you can add events to a calendar and a simple 3 day view layout
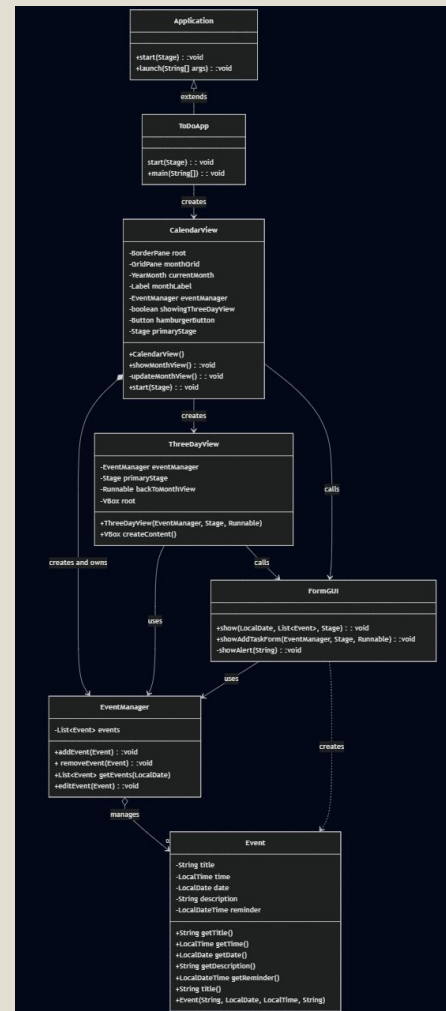

Problem Statement

I have problems with Other apps Where you have to pay for a month view and Have a view of soon to do Tasks. It will be Useful To Schedule Assignments, Meetings, etc It will allow you to see soon ToDo events at a Glance

What I have learned from this project

I have learned how to develop a simple javafx GUI program by coding, debugging, testing, and development of the application. I have learned how to create UML Diagrams. How to implement scroll pane

UML Diagram Overview
